SKILLS

- Backend
 - Spring Boot| Java
- Frontend:
 - Flutter, React
- Database: PostgreSQL,
SQLite, Firebase Firestore,
Firebase Realtime Database
- CI/CD & Mobile Automation:
GitHub Actions, CodeMagic,
Docker
- Servers: Apache Tomcat,
Apache HTTP Server/WildFly
- Backend & API Integration:
RESTful APIs, GraphQL,
WebSockets
- UI/UX Design: Figma,
Material Design, Cupertino
(iOS) styles
- Version Control: Git (GitHub,
GitLab)
- App Deployment: Google Play
Store & Apple App Store
deployment, app versioning,
release management

ABOUT ME

I am a Software Architect and Tech Innovator with over seven years of experience delivering software solutions for the African and European markets. As the co-founder of Signum Technologies, I have pioneered localized solutions in Ethiopia, including the nation’s first automated customer feedback platform and critical e-learning infrastructure during the COVID-19 pandemic. My expertise as a Full-Stack Developer covers backend, frontend web, and mobile app development, including UI/UX design, with a consistent focus on solving socio-economic challenges through high-impact, data-driven technology.

WORK EXPERIENCE

- Co-Founder & Lead Full-Stack Developer

Signum Technologies PLC

08/2019 - PRESENT

Addis Ababa , Ethiopia
- Pioneering Digital Governance & CX (EyitaHub): Conceptualized and launched the first automated Customer Feedback and Sentiment Analysis platform in Ethiopia to solve critical data collection hurdles. The system enables entities to collect, analyze, and act on feedback using AI-powered sentiment analysis.
 - Impact: Empowered local businesses and institutions to adopt data-driven decision-making, effectively bridging the communication gap between service providers and citizens.
 - National Crisis Response (Abugida Online): Engineered and deployed a bespoke E-Learning and Learning Management System (LMS) during the COVID-19 pandemic to ensure educational continuity. The platform was provided entirely free of charge to schools to support the national education system.
 - Impact: Prevented school closures by digitizing curriculum delivery for local institutions, ensuring thousands of students remained engaged and educated during national lockdowns.
 - Top Startup – Supply Chain Transformation: Architected an end-to-end multi-sided supply chain and distribution system recognized as a Top Startup in Ethiopia (2023) which we built for Afra Import & Export PLC company, integrating five specialized apps: Shops, Sales, Drivers, Agents, and Warehouse.
 - Logistics & Inventory: Implemented fleet management with real-time GPS route optimization and built an auditable QR/Barcode inventory control system with secure Proof of Delivery (POD).
 - Logistics & Inventory: Implemented fleet management with real-time GPS route optimization and built an auditable QR/Barcode inventory control system with secure Proof of Delivery (POD).
 - Growth & Engagement: Integrated customer loyalty programs and automated order capture to enhance lifetime value and streamline retail operations.

Senior Software Developer

Mr phone GmbH

09/2022 - 12/2023

Frankfurt, Germany (Remote)

- Architected a robust backend for a multi-branch Merchandise Management System (MMS), developing secure RESTful APIs with role-based access control while optimizing databases for high-volume operations. Ensured system stability and technical excellence by leading code reviews and implementing comprehensive unit and integration testing to guarantee fault-tolerant performance.

Junior Developer

Midemi

06/2018 - 07/2019

Frankfurt, Germany (Remote)

- Developed a mobile application for a Restaurant Automation Platform with secure payment integration.
- Participated in the full software development lifecycle (SDLC) in collaboration with senior developers.

Networking Intern

Abkm Engineering and Trading PLC

09/2017 - 02/2018

Addis Ababa, Ethiopia

- Assisted in network setup, hardware installation, and device configuration.
- Diagnosed and resolved connectivity issues for large-scale network projects.

EDUCATION

B.Sc. in Computer Engineering

Mekelle University

2018
